NOTICE: This permit becomes null and void if work, encroachment or construction authorized is not commenced and completed within 180 working days. All provisions of laws and ordinances governing this type of permit will be complied with whether specified herein or not. The granting of a permit does not presume to give authority to violate or cancel the provisions of any state or local law regulating construction or the performance of construction. **Required inspections must be made. Inspectors must be notified at least twenty-four (24) hours in advance.** The applicant hereby agrees that the responsibility of the City to inspect the work and work site does not relieve the permittee of the duty to keep the site safe at all times and to perform work in a manner required by City ordinances and other applicable laws. Applicant/permittee hereby covenants to protect the City and save the City harmless from all claims, actions or damages of every kind and description which may accrue to or be suffered by any person or persons, corporation, or property by reason of the performance of any work done under this permit, character of materials used, or manner of installation, maintenance and operation or by the improper occupancy of right-of-way or public place or public structure and in case any suit or action is brought against said City for damages arising out of, or by reason of any of the work or construction done under this permit, the applicant/permittee, it's successors or assigns will, upon notice to it of commencement of such action, defend the same at applicant/permittee's sole cost and expense and will satisfy any judgment after said permit or action shall have been finally determined, if adverse to the City. Any damage or deficiency to the site or within the right-of-way becomes the responsibility of the permittee unless the Public Works Inspector is notified of such damages prior to issuance of this permit. All improvements within the right-of-way shall be warranted by the permittee for a period of one year.
